Cross continental networking for social good. Africa- Asia synergy.

by Dennis Ekwere

The internet has changed our world and will continue to change the way we do things in a digital world we have found ourselves in today. Technology has made the world border-less and at the same time is opening up virgin opportunities for us to leverage on. As social entrepreneurs, we are doing our best to take advantage of this unlimited opportunities to learn, share experience and build networks for amplified voice.

In doing so, we are pleased to announce to you that we appointed Mohd Zulikhwan Bin Ayup, a Malaysian based in Malaysia as our Digital Non Executive Board member effective 3rd January 2018. It is a cross continental synergy of like minds willing to volunteer for social good through digital space. We are hopeful this experience will be a template for the world.

We believe on the power of technology in driving social change. Welcome to our new world.

TAX EDUCATION/AWARENESS PROGRAM

On 12th January 2018, we partnered with Kaduna State Board of Internal Revenue to hold a sensitization program for young people, tagged- "when it matters most". The event took place at Nasscity Evangel Academy, Nasarawa, Kaduna State, in line with SDG 17.

The program used survey technique on participants, pep-talked on 'why we pay tax' and simulation method to allow participants act, dramatize and develop problem solving skill.

At the end, we learned from participants that they will be willing to pay tax so that they will be able to enjoy good life as citizens. When young people know on time why they should pay tax, then we can reinvent the wheel. The wheel to hold Government accountable for us by us for our future.

It was fun that worth it

ROAD SAFETY AWARENESS FOR YOUNG PEOPLE

There are increasing records of road crashes and accidents on our roads. And we feel to correct it, is to reach the future today through enlightenment. Even though we all use roads and because emergency doesn't respect time and age, we stepped down this program.

On 1st February 2018, we took the first of its kind Road Safety Awareness Program to Government (Boys) College, Kurmi Marshi, Kaduna.

The program used pre and post survey with 52 participants. It uses simulation to educate and allow participants to critically think out solutions during the break out session.

what can we really do
without your giving?
